EP HENRY®

HARDSCAPING COLLECTIONS
SOURCEBOOK

What does disruptive technology look like?

In January of 1904, the following appeared in the local newspaper about my great grandfather, E.P. Henry, an early innovator in bringing concrete block to market.

THE WOODBURY DAILY TIMES: CITY NOTES

“Contractor E.P. Henry has a large lot of cement block in his yard on Delaware Street which he has made himself. They are to be used in building a house at Paulsboro. Mr. Henry says that cement houses are the coming structures: that they will outwear brick or stone houses, can be built for about half the price of either of the latter, and are equally as warm in the winter and cool in the summer.”

Concrete block was the beginning of EP Henry Corp. We have always operated for over 115 years under the premise that what made us successful today doesn't ensure our success tomorrow.

Our reputation for innovation is why we were selected to partner with Solidia eight years ago to develop and manufacture a new, planet-friendly concrete. As the next-generation concrete, Solidia pavers are cured with carbon dioxide instead of water, a manufacturing method that reduces water consumption by 80% while forever entrapping harmful CO₂ gases. This innovative process reduces the carbon footprint of concrete by 70% and eliminates efflorescence. The end result is beautiful, high-performing, eco-friendly pavers in that are literally better in every way.

Very few industries have the opportunity to significantly reduce their carbon footprint and effectively combat the effects of global warming. The concrete industry is one of these, and as a company with a history of innovation, we are committed to investing in the future of our industry as well as the health of our planet. In the early summer of this year we will launch our Solidia family of products with the intent of ultimately converting our entire product line to Solidia-based concrete. It is expected that Solidia will be available worldwide within 5 years. For many reasons, Inc. Magazine named Solidia the #1 startup to watch in 2020.

From my family to yours,

A handwritten signature in black ink that reads "J.C. Henry".

J.C. Henry III

EARLY SUMMER 2020

Berkshire Plank Paver

Perfect for contemporary designs or as a border, Berkshire comes in four colors, in five sizes.

p.120

EARLY SUMMER 2020

Trilogy

This 3-piece
modular system
will be available in
both textured and
smooth finishes.

Colorist technology is introduced to the Split Face Wall Collection starting Summer 2020

The Colorist system takes the guesswork out of blending color because the “color recipe” is programmed into the computer that runs the equipment. This advanced technology provides consistent, predictable wall color blends.

Cast Stone Wall Ledgestone Profile

EARLY SUMMER 2020

Our Cast Stone Wall is already the best-selling premium wall system in the industry, providing the look of natural stone at a fraction of the price and time to install. And now, we’re offering Cast Stone Wall in a brand new profile - Ledgestone - to expand its limitless design possibilities even further.

SYMBOL KEY

ECO PERMEABLE PAVERS

With our eco-friendly paving solutions, you can be sustainable and have a beautiful project.

DO NOT USE FOR VEHICULAR APPLICATIONS

It is not recommended to use these pavers for residential driveways.

DO NOT USE COMPACTOR

Do not use a plate compactor on Cast Stone or Lastra products.

DON'T SCUFF THE PAVERS

EP Henry recommends the use of a protective pad between the plate compactor and the paving stones to prevent surface damage during installation. EP Henry will not be held responsible for compaction scuffs or burns on pavers.

SOLIDIA FAMILY OF PRODUCTS

Denotes product manufactured with Solidia. A better concrete for a better planet.

COLOR DISCLAIMER

Photographic reproduction, print and online screen resolutions do not always present color precisely. For these reasons and to ensure your complete satisfaction with your EP Henry product, we recommend that you visit your local EP Henry Authorized Hardscaping Distributor® or ask your contractor for samples before making a final decision.

EP HENRY – A HISTORY OF INNOVATION

A 20' x 30' patio made with Solidia pavers is the environmental equivalent of planting 250 trees.

A Better Concrete
For a Better Planet

A concrete, scientific breakthrough

Scientists have known that curing concrete with CO₂ would make a stronger and more stable product, but the technology to do so did not exist. Until now.

Solidia concrete does just that. It reduces the carbon footprint by 70% and produces better, stronger pavers while conserving water by 80%, provides more vibrant colors, has a greater resistance to de-icing salts, and is free from efflorescence.

We're thrilled to announce that all of our ECO products as well as our Forma Stone will be produced using Solidia starting Early Summer 2020, and that any of our pavers can be made with Solidia by special order.

"As the trusted leader in concrete, renowned for driving both market and product innovation, EP Henry was our first choice as the global launch partner for Solidia Cement. With their unmatched market knowledge and deep expertise in product and service innovation, they have helped us make a better concrete that is not only good for customers, but for our planet. We are so grateful that EP Henry has helped us make sustainability smart business for cement and concrete."

Tom Schuler

President and CEO, Solidia Technologies

Look for the NEW Solidia Family of products as well as our newest addition, Cast Stone Wall Ledgestone. This popular stone profile will be available in two NEW colors, Aztec and Allegheny.

See the Difference

EP Henry Duraface®

Cambridge with ArmorTec®*

In over 30 years of producing this product, **EP Henry's Duraface® pavers have never worn through at the face-mix layer**, and our lifetime warranty backs it up.

Duraface®: The Process Makes the Product

For over 30 years, EP Henry has produced our pavers using the face-mix method, one of the two ways to manufacture pavers. As one of the first to do this in the US and the first in the mid-Atlantic states, we coined the term Duraface® to brand our process.

This two-step manufacturing process concentrates an enriched layer of cement, sand, pigment, and very hard, small aggregate on the top layer of the paver, which we refer to as the wear surface. In contrast to the other paver manufacturing process, the through-body method, our Duraface® paver is richer in color and has a smoother, more durable wear surface.

The face-mix manufacturing process is more sophisticated and results in a more durable paver that doesn't show large stone on the surface.

When you hear a claim that a company is the only one that uses "ArmorTec®" or "Paver-shield," what they are telling you is that they're the only manufacturer with that name for the face-mix process—not the only manufacturer using it. And compared to many of our competitors, EP Henry's pavers face-mix layer is thicker and more consistent.

The Colorist System: Consistent, Accurate Color Blending Coming Soon to EP Henry Walls

Six years ago, we invested in the world's most sophisticated system to produce blended pavers. And now, we're rolling this technology out to a wider range of EP Henry products, by applying it to our Split Wall Systems and Aged Wall Collection.

The Colorist System uses proprietary German technology to produce consistent color blends with pinpoint accuracy.

Prior to the Colorist System, colors were batched and applied by the individual paver machine operator, which left room for color inconsistencies from batch to batch. In the field, a contractor would then have to take extra care to create an equal distribution of color.

The Colorist System takes the guesswork out of color blending by using a color "recipe" that is dispersed by preprogrammed equipment.

We're thrilled to add the Colorist System to our Wall product line this year.

This year, we're continuing to expand our Colorist technology to even more EP Henry products.

PREMIERE PAVER COLLECTION

ENHANCED COLOR. ADVANCED PROTECTION.™

Resists staining

Reduces fading from UV rays

Improves protection from acid rain

Bristol Stone Smooth I with ColorTech Sonoran, Random Installation

Only EP Henry offers the exceptional colors and lasting protection of **ColorTech™ & Belmont Pavers.**

EP Henry's Premiere Paver collection delivers next-level durability, unparalleled color richness, and enhanced protection from spills, stains, and UV rays.

Our Premiere Collection of Bristol Stone and Chiseled Stone pavers are made with ColorTech, our proprietary integral sealer that's "baked in" to the paver to deliver enhanced protection along with rich colors that mimic shades found in natural stone. We've incorporated similar technology into our Belmont line, allowing you to avoid the time and expense of topical sealing. Save time and increase performance with ColorTech and Belmont pavers.

Our newly-expanded Belmont line is now available in caps and stair treads as well as pavers. Choose EP Henry's Premiere Collection for long-lasting color and durability that enhances the appearance of your backyard today and protects your investment for tomorrow.

Available in all Premiere Collection pavers and by special order on our Classic Collection.

ECO Bristol Stone with Solidia Pewter Blend, Random Installation; Brick Stone Charcoal border

SOLIDIA®

A Better Concrete For a Better Planet

The next big advancement in hardscaping is here. Solidia technology produces durable pavers that:

- reduce the carbon footprint up to 70%
- have vibrant, long lasting color
- conserve water
- have a greater resistance to de-icing salts
- are free from efflorescence
- obtains 28 day strength in 24 hours

To learn how ECO Friendly Solidia technology works, visit [page 32](#).

Cast Stone Wall Collection

Single Sided Cast Stone Wall Cut Stone Breckenridge; 14" Double Sided Belmont Caps Limestone

Cast Stone Wall

Get the Look of Natural Stone at a Fraction of the Cost

Cast Stone Wall features artisan-crafted stone profiles molded from actual stone. We use over 100 molds, eliminating the chances of creating a duplicate pattern. The assortment of carefully selected colors and stone surfaces is why this wall system outshines both split face and wall block.

When it comes to choosing a wall or stone surface, Cast Stone Wall adds a layer of color, texture, and sophistication to any outdoor space.

Double Sided Cast Stone Wall and Cast Stone Wall Face Shells Cut Stone Breckenridge paired with Bristol Stone I and II Phoenix, Random Installation

Double Sided Cast Stone Wall and Cast Stone Wall Circle Fire Pit Kit Cut Stone Birch paired with Chiseled Stone I with ColorTech Slate Green, Random Installation

Here's how we do it.

We start with our wet-cast face molds that were created by using hundreds of specifically selected natural stone pieces. We then permanently embed a dry-cast structural segmental "backer" block to the wet, stone-finish face mold. The process allows us to marry two technologies, creating a wall block that emulates the textures and colors of natural stone, while producing a unit that provides structural integrity for building walls.

Cast Stone Wall's ease and speed of installation allows homeowners to incorporate the look and feel of natural stone throughout their outdoor space at a fraction of the cost of natural stone.

Premium Pairings

Choosing Pavers and Wall Colors

Having trouble deciding on colors? No problem – our Premium Collection of Pavers and Cast Stone Walls were designed using color blends that complement each other. This way, you can mix and match a number of paver and wall combinations and the end result will always coordinate beautifully.

SPEC MIX® Polymer Modified Adhered Veneer Masonry Mortar

SPEC MIX PMAVM is a technologically advanced adhered veneer mortar for use in bonding manufactured stone veneer, natural thin cut stone and thin brick to a cementitious substrate. PMAVM is designed to provide excellent workability and cohesion, high bond strength and durability, sag and water resistance and efflorescence minimization.

SPEC MIX PMAVM has been rigorously tested to reduce the probability of unit "pop-offs" and contractor call-backs to repair adhered veneer failures common with standard mortars.

EP Henry recommends installation methods and guidelines from the Masonry Veneer Manufacturers Association.

Standard Isokern Fireplace with double wood boxes;
Cast Stone Wall Face Shells Cut Stone Breckenridge

EARTHCORE ISOKERN MODULAR FIREPLACES

For over 25 years, Earthcore's Isokern Systems have been the leader in safe, lightweight, easy to install fireplace systems and are backed by a Lifetime Warranty against manufacturer defects.

The Standard series comes in 36", 42" and 46" openings.

The Magnum series comes in 36", 42" and 48" openings.

Please visit the products section of our website for more information on Isokern Fireplaces.

Outdoor Kitchen Collection

Cast Stone Wall Face Shells Cut Stone Aspen

ISOPANEL MODULAR KITCHENS

Isokern has streamlined the construction of building the classic culinary outdoor kitchen for quick assembly. Using our Isokern Panels and Clips, building a beautiful, durable and practical outdoor kitchen is easier than ever. The IsoPanels will also support the Iso'ven for added options to construction.

ISOKERN PANELS

- **Dimensions per panel:** 24" w x 34" h x 3" d
- Each panel weighs only 100 lbs, so they're easily moved when assembling your new outdoor kitchen components.

CLIPS

- **Use:** Slide the appropriate clip over the junction of 2 adjacent panels for holding them together while the mortar is applied.
- **Options:** A. Straight B. 90° C. 45° D. T clip.

ISO'VEN WOOD BURNING PIZZA OVENS

Iso'ven with Cast Veneer Stone Ledgestone Silverton

Iso'ven with Cast Veneer Stone Ledgestone Silverton

ISO'VEN & EP HENRY'S CAST VENEER STONE

There's nothing better than a real wood burning oven. Introducing the Earthcore Iso'ven Wood Burning Oven, the user-friendly, remarkably affordable outdoor wood burning pizza oven made from our exclusive volcanic material. Created for easy installation, the quick-fire Iso'ven heats up to 800 degrees in an hour. The Iso'ven Wood Burning Pizza Oven comes with everything you need to get started. Perfect for 12" pizza, bread, wings and more. Includes: Proprietary Oven Liner, Refractory Mortar, Cooking Surface, Thermometer and Starter Fire Kit.

All Isokern fireplaces, pizza ovens and modular kitchen kits can be made "personally" yours by customizing it with EP Henry's beautiful Cast Veneer Stone or Cast Stone Wall Face Shells, the closest match to real stone, at a fraction of the cost.

SEE PAGE 82 FOR CAST VENEER STONE COLOR AND STYLE OPTIONS

TABLETOP OVEN WITH OPTIONAL STORAGE SPACE

Fires strengthen the bonds between friends and family. Recognizing this, Earthcore developed the ideal companion for your Iso'ven Wood Burning Pizza Oven — our Table Top Oven with Optional Storage Base. Adding a new dimension to backyard dining, it allows you to choose the height of your Iso'ven in relation to the rest of your outdoor kitchen or living space.

OPTIONAL STORAGE:

Ample room for wood, pizza peels, aprons, cooking tools and more.

31 1/2" x 53" x 28"
850 lbs

OPTIONAL HOOD:

Following the classic approach of traditional wood burning ovens, the Iso'ven is designed to vent through the front. But at Earthcore, we believe customization creates satisfaction. So if you prefer a flue, we now offer a hood for Iso'ven designs, giving you the freedom to finish it in your own personal style.

30 5/8" x 9" x 23"

CREATE THE PERFECT OUTDOOR KITCHEN

PRE-MEASURED-CUT-PACKAGED-KITS

The Kitchen is a series of individual cabinet kits that come complete with everything you need to build, including precut block and granite tops sized to fit, reinforcements, and more! Depending on the complexity, most kitchens can be built in a day or less. Build your kitchen all at once or add new features over time. Because of their modularity, expanding your outdoor cooking and entertaining space is easy to do at any time.

EP Henry offers a complete line of cleaning and sealing products from TechniSeal® to maintain the beauty of your pavers.

POLYMERIC SAND FOR PAVER JOINTS

HP NEXTGEL™ POLYMERIC SAND

- False and wide joints
- Heavy-sloped and high-traffic areas
- High-humidity areas and pool decks

SMART SAND

- New Haze-Free technology
- For concrete paver joints from 1/8" to 1"
- Superior strength
- Driveways, patios and walkways

CLEANERS

PROFESSIONAL-GRADE OIL & GREASE REMOVER

- Dislodges deeply set petroleum-based products, motor and hydraulic oil

DIRT & GREASE CLEANER

- Removes motor oil and grease

RUST REMOVER

- Removes stains caused by steel, rusted metal objects and fertilizers

PAINT, TAR AND RUBBER REMOVER

- Dissolves paint, tar or bitumen, rubber and chewing gum

ORGANIC STAIN REMOVER

- Effectively removes moss, mildew, dead leaves, wine, blood and non-greasy food stains

PAVER RESTORER

- Removes cement and mortar jointing haze

PAVER PREP / EFFLORESCENCE CLEANER

- Dislodges efflorescence and ground-in dirt
- Prepares pavers prior to sealant application

ECO-STRIPPER

- Removes most stains, sealants and coatings without affecting the surface

SEALERS

NATURAL LOOK MATTE FINISH PENETRATING (IN)

- Preserves the natural look of pavers
- Ideal for slip-prone surfaces

CLEAR LOOK SATIN FINISH (EV)

- Preserves the original color of pavers
- Ideal for driveways, patios and walkways

COLOR BOOST MATTE FINISH PENETRATING (CB)

- Enhances the color of pavers
- Ideal for slip-prone surfaces

WET LOOK GLOSS FINISH (WLS)

- Enhances the color of pavers
- Ideal for driveways, patios and walkways

SUREFOOT I ANTI-SLIP GRIT FOR WATER-BASED PROTECTORS

- Mixes easily with Protector without changing its appearance
- Highly recommended for pool decks and sloped driveways, steps, low porosity substrates, etc.

NULOOK® TINTED PROTECTOR FOR CONCRETE PAVERS SEMI-GLOSS FINISH

- Colors pavers
- Water based
- Choice of 4 rich colors

PRODUCTS FOR CAST STONE SLABS

WET-CAST PAVER PREP

- Prepares wet-cast pavers prior to sealant application

PROTECTOR FOR WET-CAST PAVERS (WC) NATURAL LOOK MATTE FINISH — PENETRATING

- Preserves the natural look of wet-cast pavers

RG+ CONCRETE ADHESIVE

- Low-VOC formula
- Ultra-adherent on dry, wet or frozen surfaces
- Elastomeric resin-based compound — remains flexible
- Ideal for the construction of retaining walls

STRUCTURE BOND ADHESIVE

- Super-strength hardscape foam adhesive
- Designed for use with Cast Stone Wall and other wall products
- Precise delivery - No mess, no waste
- 8 minute bond time
- Adheres to wet masonry products
- Adjustable bead size
- Performs on all construction materials
- Fireproof and waterproof
- One 24 oz. can is equivalent to five 10.5 oz. tubes

DRIBOND™

- Ideal for thin paver options
- Dry application
- No mixing—ready to use

BORDERBOND™

- Easy to use—straight from the bottle
- Easily mixes with Dribond
- Maximizes strength from Dribond

SATIN LOOK (JS) SATIN FINISH PAVING PROTECTION

- Enhance the color of pavers
- Stabilizes sand or aggregate joints
- Stain guard

Polymeric Sand Haze

Polymeric Haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not, in any way, affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner. It is advised that you contact your contractor or the manufacturer of the polymeric sand used for advice on recommendations.

EP Henry accepts NO responsibility or liability for this occurrence.

ACCESSORIES

SEK SUREBOND

PAVER EDGE RESTRAINT

The purpose of Edge Restraint products is to restrain pavers' lateral motion. Without a proper Edge Restraint System, pavers are prone to shifting. EP Henry offers the Snap Edge Paver Restraint System.

ADVANTAGES OF THE SNAP EDGE RESTRAINT SYSTEM:

- One-piece system does it all; straight, curves, or even a complete radius, without waste
- An 8" piece transports easily and requires no extra connectors
- Open base design allows for grass growth along paver edge, creating a strong yet invisible edge
- Patented snap and spike-together ends for a secure connection and extra support
- Rugged injection-molded plastic ensures the strongest edge designed for vehicular and patio/walkway applications

ADHESIVE

EP Henry offers the following adhesive for wall applications:

SUREBOND PAVER BOND

- High strength structural grade adhesive
- Durable formula withstands extreme wear and tear, including heavy vehicular traffic
- Sets quickly in only 10 minutes
- Freeze-thaw stable
- Naturally shims

TENCATE MIRAFI

SEPARATION FABRIC

Mirafi® 500x geotextile fabric is recommended for use with all paver installations. Its primary purpose is to keep the base material from working its way into the soil underneath, thus reducing the possibility of settling.

This product, which costs only pennies per square foot, is an inexpensive insurance policy for your pavement.

GEOGRIDS

EP Henry offers the highest quality geogrids for SRW applications.

MIRAFI® GEOGRID

1XL 20 SQUARE YARD	4' X 45'	ROLL
2XT 33.3 SQUARE YARD	6' X 50'	
3XT 200 SQUARE YARD	12' X 150'	
5XT 200 SQUARE YARD	12' X 150'	
8XT 267 SQUARE YARD	12' X 200'	

UX MESA GRID

UX1100 121 SQUARE YARD	4.36' X 250'	ROLL
UX1400 121 SQUARE YARD	4.36' X 250'	
UX1500 96.9 SQUARE YARD	4.36' X 200'	
UX1600 96.9 SQUARE YARD	4.36' X 200'	
UX1700 96.9 SQUARE YARD	4.36' X 200'	

Please note: Mesa UX Grid must be used on all Mesa SRW applications.

STRATA

SLEEVE-IT® SYSTEM

WHEN YOUR WALL NEEDS A FENCE

The Sleeve-It® System is a patented, code-compliant, fence post anchoring system that integrates stable fence footings into the support structure of walls while the retaining wall is being constructed. This unique fence system is pre-engineered and pre-designed so that the usable real estate at the top of a retaining wall is not wasted. Using the system as part of the Segmental Retaining Wall (SRW) eliminates a 3 foot offset requirement for rails and fences that are added after wall construction, reducing specifier liability and associated costs with building-code compliance. Sleeve-It® also offers a below grade engineered design that provides superior safety in a cost-effective solution.

KERR LIGHTING

Create beauty and instill pride of ownership by adding the finishing touch of Kerr Lighting for pavers, retaining & seat walls, pillars & steps and more!

PAVER LIGHTS

SPEC MIX®

Polymer Modified Adhered Veneer Masonry Mortar

SPEC MIX PMAVM is a technologically advanced adhered veneer mortar for use in bonding manufactured stone veneer, natural thin cut stone and thin brick to a cementitious substrate. PMAVM is designed to provide:

- Excellent workability and cohesion
- High bond strength and durability
- Sag and water resistance
- Efflorescence minimization

SPEC MIX PMAVM has been rigorously tested to reduce the probability of unit "pop-offs" and contractor call-backs to repair adhered veneer failures common with standard mortars.

WARRANTY DETAILS

INDUSTRY EXCLUSIVE LIFETIME PRODUCT WARRANTY AND LIMITED INSTALLATION WARRANTY

Because we believe that the best warranty is one that you never use, we build quality into every product. We are so confident in our products that we offer a Lifetime Warranty on the structural integrity* of our paving stones and wall systems for residential use. At no cost to you, EP Henry will replace paving stones and wall system products whose structural integrity is found to be defective under normal use when properly installed according to EP Henry standards and guidelines (labor excluded). We also offer an industry exclusive Limited Installation Warranty on projects installed by an EP Henry Authorized Hardscaping Contractor®, referred through our Project Services team.**

For complete terms and conditions of the warranty, visit ephenry.com.

*A defect in "structural integrity" means the inability of a properly installed and maintained paver or wall product to perform the function for which it was designed due to defects in material. A defect in "structural integrity" does not mean a function caused by improper installation, workmanship or efflorescence.

**Homeowners must register their project through EP Henry Project Services. Proof of purchase required.

Cast Stone Wall and Cast Veneer Stone products are covered under a separate warranty; please visit our website for details.

PRODUCT NOTES

READ PRIOR TO PURCHASING OR INSTALLING ANY PAVER OR WALL PRODUCT

If you believe there is an issue with product style, color, or quality, do not install it and please contact your distributor immediately. Save all cube tags and provide to the distributor or manufacturer's representative who comes to the job site. INSTALLATION OF PRODUCT IS DEEMED ACCEPTANCE. No claims or returns on installed product will be allowed.

EFFLORESCENCE

Efflorescence is a whitish, powder-like deposit common on concrete and masonry products which will normally disappear over time with natural weathering. According to the Interlocking Concrete Pavement Institute (ICPI), it will typically stop developing within 18-24 months. Although it may present an aesthetic concern, efflorescence will not affect the structural performance of pavers or wall systems. Efflorescence is a natural occurrence for which EP Henry accepts neither responsibility nor liability. For more information, please visit: www.icpi.org, www.ncma.org, www.masonryinstitute.org, or www.bia.org.

POLYMERIC SAND HAZE

Polymeric haze from the use of polymeric joint sand may appear on your pavers if the sand was not removed from the surface of the pavers properly. This does not in any way affect the integrity of your pavers or the installation. The haze will weather away naturally with time. If you wish to remove it with a cleaning product, it is recommended that you contact your distributor or the manufacturer of the polymeric sand used for advice and product recommendations. EP Henry accepts NO responsibility nor liability for this occurrence.

Please see p.137 for more information.

DE-ICING SALT STATEMENT

NOTE: This is an updated recommendation based on new testing within the concrete industry.

Rock Salt (sodium chloride) or NaCl is the least damaging to concrete materials and should be used whenever possible. Please refer to ICPI's De-Icing Chemical Technical Bulletin for more information.

COLOR

EP Henry Hardscaping products are made from natural materials and variations in shade can be expected. Additionally, many of our colors are achieved through a random mixture of several colors and the presence of any of these colors will vary from one unit to another. It is recommended that the installer draw from multiple cubes of material during installation to disperse any color range more uniformly. The end user of the material (home or business owner) should make their selection from current physical product samples that show the range of color.

DON'T SCUFF THOSE PAVERS!

EP Henry recommends the use of a vibrating plate compactor with a protective pad to prevent surface damage to the pavers during installation. EP Henry will not be responsible for compaction scuffs or burns on pavers. **PLEASE NOTE**, some pavers and all Cast Stone slabs should not be compacted using a vibrating plate compactor.

Look for this symbol  on product pages for restrictions.

NEXT STEPS

Whether you are looking to add a new front walkway to increase your curb appeal or planning an awe-inspiring outdoor living space, beginning a construction project can be a bit overwhelming at first.

We get it.

It's a big decision and you want it done right. We can help with the groundwork. In this fast-moving world of automation, sometimes you just need to talk to a live person, one-on-one. That's why we have a full-time Project Service team to take your call and answer your questions.

Give us a call.

We'd love to learn about your project. We can help you find experienced EP Henry Authorized Hardscaping Contractors® in your area so you can begin discussing design ideas and getting quotes that fit your space and budget.

We take it a step further.

Because our goal is to provide you with the best product and ensure you get the best finished project, we have experts at every level to support our distributors and contractors with Technical and Product Installation assistance.

We've got you covered.

We are so confident in our products that we offer a FREE Lifetime Warranty on the structural integrity of our paving stones and wall products for residential use. That's saying a lot for a company that began in 1903. Take advantage of our industry-exclusive Limited Installation Warranty on projects installed by an EP Henry Authorized Hardscaping Contractor, referred through our Project Services team.

Get started!

Call us at 800-44-HENRY (800-444-3679) or visit ephenry.com/contact and an EP Henry Project Services team member will help you go from inspiration to installation.

“Maintaining the patio is so easy! We live in a wooded area with lots of birds. We simply hose down the patio. No cleaning products needed! Thus far, we've had all types of food and beverage spillage, all of which was easily removed with hosed water. The patio is beautiful and we've received endless compliments. We've showcased our patio on social media and one person commented, “Are those EP Henry pavers?” The quality of these pavers is well-known and, when seen, unmistakably EP Henry.”
