

# Natural Stone

## **Natural Cleft Bluestone \$**

- This means it has a more natural texture to the surface
- Can be dry laid or wet laid
- Gives a natural look like it has always been there
- More price efficient since it takes less work to cut/make
- Can get it in all different sizes

This photo shows “Full Range” bluestone which means there are varying colors giving it a more natural look

## **Thermal Bluestone \$\$**

- This means it is very smooth and it can also be called sawcut
- Can be dry laid or wet laid
- Wont stub your toes
- Easier to shovel snow off in the winter, you wont have snow getting stuck in the texture (as it would for natural bluestone)
- Can get it in all different sizes

This photo shows “Blue Blue” or “True Blue” bluestone where all bluestone will in the same blue/grey range of color

## **Bluestone Treads: \$\$**

- These can be used as a cap for retaining walls/steps/border for patio
- Usually always come in “Blue Blue” or “True Blue”. Meaning a dark grey/blue consistent color
- Usually always come with a “sawcut finish” meaning the sides are straight cut. If customer would like them rockface that would be an additional charge
- Selling Point: this gives a uniform cap vs having smaller caps to make up a stair tread/cap
- Can get them in all different sizing. Length varies by foot and width usually varies by 2”. The height of these will always be 2”

## **Limestone Treads: \$**

- Come in a more sandy/beige color. Tend to be more porous than bluestone
- Can be used as a cap for retaining walls/steps/border for patio
- Can get them in all different sizing. Length varies by foot and width usually varies by 2". The height of these will always be 2"
- Selling Point: Cheaper than bluestone. Usually always comes with one side rockface to give a more nature look like the photo below

## **Travertine \$\$\$**

- Can be dry laid or wet laid
- Good for around pools as it does not get very hot. There are several different colors you can get
- Not ideal for outdoor use as it is very porous and could crack during the freeze/thaw period of winter

## **Irregular Flagstone or Bluestone \$\$**

- Can be dry laid or wet laid
- Very unique looking and has all different sizes
- It can vary slightly in heights of the stone(s) since it is natural
- Joint width can vary to accommodate different looks

## **Brick \$\$\$**

- Can be dry laid or wet laid
- Has different finishes (refurbished, smooth, distressed, etc.)
- Many creative design options and patterns

## **Cobbles (Belgium Block) \$\$\$**

- Can only be wet laid
- Does has uneven elevations due to it being a natural stone
- More so used for driveways and aprons, but can be used for walkways

## **Fieldstone \$\$\$**

- Provides a rustic and natural finish
- There is more of an unevenness to it compared to other stones
- They are much larger/thicker than Flagstone

## **Antique Granite Wall Stone \$\$\$\$**

- Can be dry stacked or used with mortar
- Large size differences and generally rectangular in shape
- Can be used for steps too

## **Fieldstone Walls \$\$**

- Can be dry or wet laid
- Has rounder stones worked in a pile and more tumbled edges
- Has more tans and beiges with small hints of grey

## PA Fieldstone 1"-3" \$

- Have a darker color usually and stones are more rounded on the edges
- Good for a boarder around plant beds or tree circles, dry laid
- Would not recommend going higher than 12" as it is dry laid and may buckle over time
- Good alternative to giving a natural look verses using a standard retaining wall block
- Is always sold by the pallet. Color and sizes vary in the pallet and usually range from grey/beige/greenish blue color

## **Colonial Wall Stone 1"-3" \$\$**

- Good for a boarder around plant beds or tree rings, dry laid
- Would not recommend going higher than 12" as it is dry laid and may buckle over time
- Good alternative to giving a natural look verses using a standard retaining wall block
- Is always sold by the pallet. Color and sizes vary in the pallet and usually range from light grey-beige
- Have a snapped finish making it look cleaner and more organized
